

# Adobe Font Folio OpenType Edition 2003

The Adobe Folio 9.0 containing PostScript Type 1 fonts was replaced in 2003 by the Adobe Folio OpenType Edition ("Adobe Folio 10") containing 486 OpenType font families totaling 2209 font styles (regular, bold, italic, etc.).

Adobe no longer sells PostScript Type 1 fonts and now sells OpenType fonts. OpenType fonts permit of encrypting and embedding hidden private buyer data (postal address, email address, bank account number, credit card number etc.). Embedding of your private data is now also customary with old PS Type 1 fonts, but here you can detect more easily your hidden private data. For an example of embedded private data see <http://www.sanskritweb.net/forgers/lino17.pdf> showing both encrypted and unencrypted private data. If you are connected to the internet, it is easy for online shops to spy out your private data by reading the fonts installed on your computer. In this way, Adobe and other online shops also obtain email addresses for spamming purposes. Therefore it is recommended to avoid buying fonts from Adobe, Linotype, Monotype etc., if you use a computer that is connected to the internet. See also Prof. Luc Devroye's notes on Adobe Store Security Breach spam emails at this site <http://cgm.cs.mcgill.ca/~luc/legal.html>

**Note 1:** 80% of the fonts contained in the "Adobe" FontFolio CD are non-Adobe fonts by ITC, Linotype, and others.

**Note 2:** Most of these "Adobe" fonts do not permit of "editing embedding" so that these fonts are practically useless.

Despite these serious disadvantages, the Adobe Folio OpenType Edition retails presently (March 2005) at US\$8,999.00. It is not known whether there exists a mentally sane person who has ever paid this amount for the Adobe Folio Edition.

Ulrich Stiehl, Heidelberg 2005

## 1. List of the "Adobe" Font Folio Fonts with Permission of "Editing Embedding"

## 2. List of the "Copyright" Notices of the "Adobe" Fonts of the "Adobe" Font Folio OpenType Edition

On comparing the "copyright" notices of the **Adobe Font Folio 7** (<http://www.sanskritweb.net/forgers/adobe7.pdf>) and the **Linotype Library Gold Edition 6.0** (<http://www.sanskritweb.net/forgers/linodobe.pdf>) with the "copyright" notices of the "Adobe® Font Folio® OpenType® Edition" (that's how the Adobe font forging outfit labels this edition), you see, how the Adobe "managers" Charles Geschke® und John Warnock® have "managed" the "copyright" notices.

For legal details read § 506 (Criminal offenses), lit. (d) and (e), of the "Copyright Law of the United States of America":

(c) Fraudulent Copyright Notice. – Any person who, with fraudulent intent, places on any article a notice of copyright or words of the same purport that such person knows to be false, or who, with fraudulent intent, publicly distributes or imports for public distribution any article bearing such notice or words that such person knows to be false, shall be fined not more than \$2,500.

(d) Fraudulent Removal of Copyright Notice. – Any person who, with fraudulent intent, removes or alters any notice of copyright appearing on a copy of a copyrighted work shall be fined not more than \$2,500.

Here are a few examples of how Charles Geschke® und John Warnock® have "managed" the "copyright" notices:

1. The font "Bernhard Std Bold Condensed" (see below sub voce) bears the old "copyright" notice "Copyright © 1995, 2001 Adobe Systems Incorporated. All Rights Reserved" and the old "trademark" notice "Linotype is a trademark of Linotype-Hell AG and/or its subsidiaries". Here the Adobe font forging outfit "forgot" to forge the "copyright" notice.
2. The font "Adobe Garamond Pro" (see below sub voce) bears the "copyright" notice "Copyright © **2000**, 2001 Adobe Systems Incorporated. All Rights Reserved. U.S. Patent Des. 318,290 and 327,903", while on Font Folio 7, the font bears the "copyright" notice "Copyright (c) **1989**, 1992 Adobe Systems Incorporated. All Rights Reserved. Adobe Garamond is a registered trademark of Adobe Systems Incorporated". Legal note: Designs are protected in the USA only for a few years. Hence the "forging" of the "year of **first** publication" in the forged "copyright" notice. For "year of first publication" see US Copyright Law, § 401, lit. (b). Of course, the font Garamond was designed in the 16th century, so that both "first years" statements by Adobe are false (see § 506: Fraudulent copyright notice).
3. The font "Century Old Style Std" has the "copyright" notice "Copyright © 1986, 1990, 1991, 1994, 2001 Adobe Systems Incorporated. All Rights Reserved" (see below sub voce), and on the Font Folio 7, "Century Old Style" has this "copyright" notice: "Copyright (c) 1986, 1990, 1991, 1994 Adobe Systems Incorporated. All Rights Reserved". This is an example of the fonts, the "copyright" notices of which were **not** altered on the later OpenType Font Folio. However, it should be mentioned that "Century Old Style" was designed by Morris Fuller Benton in 1906.
4. The font "Candida Std" (see below sub voce) bears the "copyright" notice "Copyright © 1989, 2002 Adobe Systems Incorporated. All Rights Reserved", while on the Font Folio 7, this font bears the "copyright" notice "Copyright (c) 1989 Adobe Systems Incorporated. All Rights Reserved. Candida is a registered trademark of Fundicion Tipografica Neufville S. A" and the notice "Copyright (c) 1989 Fundicion Tipografica Neufville S. A. This record material and the data recorded thereon is the property of Fundicion Tipografica Neufville S. A. and Adobe Systems Incorporated, or its licensors, and may not be reproduced, used, displayed, modified, disclosed or transferred in any manner without the express written approval of Fundicion Tipografica Neufville S. A. and Adobe Systems Incorporated". Legal note: The font "Candida" was designed by Jakob Erbar in 1936 for the German foundry Ludwig & Mayer in Frankfurt am Main. Nearly 50 years ago, in 1958, the German "Supreme Court" (BGH) ruled that this font "Candida" is **not** copyrighted (see <http://www.sanskritweb.net/forgers/kunstwerk.pdf>). Now Adobe declared this font "Candida" as "copyrighted" "Adobe" Font, and in the OT font, Charles Geschke® und John Warnock® removed the Neufville "copyright" notice.
5. The font "Avenir LT Std 55 Roman" (see below sub voce) bears the "copyright" notice "Copyright © **1989**, 1995, 2002 Adobe Systems Incorporated. All Rights Reserved. © **1981**, 1995, 2002 Heidelberger Druckmaschinen AG. All rights reserved", while on the Font Folio 7, this font bears the "copyright" notice "Copyright (c) **1989** Adobe Systems Incorporated. All Rights Reserved. Avenir is a registered trademark of Linotype AG and/or its subsidiaries". These two different "copyright" notices on Font Folio 7 and on Font Folio OpenType are most interesting for criminal lawcourts, since at least one of the two "copyright" notices seems to be a fraudulent copyright notice (see § 506 c). In 1989, Adobe declared to be the only "copyright" holder, but in 2003 on the Font Folio OpenType, Adobe declared that in **1981**, the Heidelberger Druckmaschinen AG "owned" the "copyright", which Adobe "owned" in **1989**. That's how the Adobe "managers" Charles Geschke® und John Warnock® "manage" the "copyright" notices.
