

Fonts bundled with Adobe Software

This document describes

1. PS Type 1 fonts bundled with various **older** Adobe Software (Page Maker etc.)
2. OpenType fonts bundled with various **newer** Adobe Software (InDesign etc.).

All fonts are provided with the Adobe copyright notice, although most fonts are non-Adobe fonts. It seems that these fonts were appropriated by Adobe (compare § 506 c USA Copyright Law: Criminal offenses: Fraudulent copyright notice). You should insist that Adobe supplies an expertise by independent lawcourt experts about these purportedly fraudulent copyright notices.

Ulrich Stiehl, Heidelberg, 10-June-2005

1. PostScript Type 1 fonts bundled with older Adobe Software
