

Herlitz 4.000 Fonts 2002

by Herlitz alias Solus GmbH alias New Media Agency GmbH alias Susanne Kurschus

The shady company "Solus GmbH" in Iserlohn (Germany), also known as "New Media Agency GmbH" in Menden, which is using or appropriating the name "Herlitz" of a company producing stationery (see <http://www.herlitz.de>) and which is run by Mrs. Susanne Kurschus alias Mr. Sven Kurschus, is producing the worst rip-off typeface collection CD that I have ever seen. The files on this Herlitz CD have been ripped off from private BBS sites which often offer the fonts of commercial foundries after having replaced the original copyright notices by false notices (e.g. by "FREEWARE!", see below).

In order to show how the fonts of the Herlitz CD were forged, I wrote a special program that dumps all internal entries of TrueType fonts. In this way a lot of additional data which are usually not seen by the user, are made visible. Examples:

AvantGarde-Book Wd Regular AVANTGAW AvantGarde-Book Wd Regular: AvantGarde-Book Wd AvantGarde-BookWd
Fantazia Fonts and Sounds

shows the source of the Herlitz rip-off fonts.

ABCTech Bodoni Wave Regular ABCTEC03 ALLTYPE:Bodoni Regular:MIKE ABCTech Bodoni Wave Converted from U:\HOME\PEARCE\AT\TTFONTS\ST000008.TF1 by ALLTYPE Bodoni

shows the subdirectories used by the font rippers.

Action Jackson Regular ACTIONJ Frog: ... NO MONEY must ever exchange hands for this font file, without EXPLICIT WRITTEN PERMISSION from the designer. This means you MAY NOT SELL THIS FONT on a font-collection CD

shows that Herlitz ripped off fonts not be included on font CDs

EurostileExtended-Roman-DTC Regular EUROSTI3 ALLTYPE:EurostileExtended-Roman-DTC Regular:MIKE EurostileExtended-Roman-DTC Converted from D:\FONTTEMP\EUX____.TF1 by ALLTYPE EurostileExtended-Roman-DTC

shows that Herlitz appropriated trademarks registered by others

The Herlitz CD contains fonts ripped off from almost all type foundries, and if you click e.g. on the commercial font "StoneSans" (by Sumner Stone), you are greeted by the message "FREEWARE!"

Aachen-Bold	Bitstream	StoneSans (TrueType) Schriftart: StoneSans Dateigröße: 16 KB Version: FREEWARE! abcdefghijklmnopqrstuvwxy ABCDEFGHIJKLMNOPQRSTUVWXYZ 1234567890.,;('*!?)
Antique-Olive	Adobe	
Arial	Agfa/Monotype	
AvantGarde	ITC	
Bodoni CG	Agfa/Compugraphic	
City	Berthold	
Eurostile	Nebiolo	
Garamond	Linotype	
Trebuchet	Microsoft	

Most fonts of the Herlitz CD are defective. For instance, the above "StoneSans" does not contain the German umlauts äöü etc.

Latest News: It seems that Susanne Kurschus, who claims to be the business manager of the "New Media Agency GmbH", which is not mentioned in the German telephone directory, went into hiding. The website <http://www.n-m-a.de> registered for "New Media Agency GmbH", Loessler Str. 108, 58644 Iserlohn, and run by Mr. Sven Kurschus, has recently been closed. Note for public prosecutors: Mrs. Susanne Kurschus is living (or has been living) in 58638 Iserlohn, Friedrich-Kaiser-Str. 21.

This document consists of two lists:

- List 1 (pages 2-78) contains the „copyright notices“
- List 2 (pages 79-190) contains all other font internals

Ulrich Stiehl, Heidelberg, August 2005

1. List of the „Copyright Notices“

"Font Name"	"Copyright Notice"

Aswell Bold ASWEB___ Aswell Bold Aswell Bold Version 1.0 5/3/97 AswellBold Unauthorized Type Unauthorized Type Ben McGehee This version includes capital and lowercase letters, some commonly used punctuation and a few international characters by special request. The original Aswell font was kind of thin for my tastes. I realized this after I started playing with it. I figured that someone else felt the same. So I created a bold version. I think it looks a little better. See the original Aswell readme for the explanation on the creation of the font.
<http://www.latech.edu/~bmcgehee/untype/index.htm> <mailto:bmcgehee@enr.latech.edu> You use this font in any way that you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.) You may distribute it on CD, disk, or any other medium, but you may not sell it.

Beta Dance Regular BETAD__ Macromedia Fontographer 4.1 Beta Dance Beta Dance 1.0 10/2/97 BetaDance <http://www.latech.edu/~bmcgehee/untype/index.htm> Unauthorized Type Ben McGehee This version includes upper and lowercase letters, punctuation, and many international characters. I also included some UA Type dingbats (just to amuse myself, and so you don't get those annoying boxes when you type something that isn't in the font). Alpha Dance is pretty cool. But as I was playing with it, I realized that the straight lines didn't look as good as I thought they would. So I thought, "Hey, make it a little more rounded." So I did. I am now realizing that the Alpha was in reference to the stage of creation of the font. As you can see, this one is in Beta. Maybe I'll bring it out of Beta one day. Or not. <http://www.latech.edu/~bmcgehee/untype/index.htm> <mailto:bmcgehee@engr.latech.edu> You use this font in any way that you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.) You may distribute it on CD, disk, or any other medium, but you may not sell it.

Christian Crosses II Regular CHRICI__ Macromedia Fontographer 4.1 Christian Crosses II Christian Crosses II Version 1.00 9/6/98 ChristianCrossesII UnAuthorized Type and Paul Kiler

Christian Crosses Regular CHRIC___ Macromedia Fontographer 4.1 Christian Crosses Christian Crosses 1.0 10/14/97 ChristianCrosses <http://www.latech.edu/~bmcgehee/untype/index.htm> UnAuthorized Type Ben McGehee When I was studying in Rome, I saw lots of churches. So I saw lots of crosses, too. I got really interested in the variety of crosses that

churches had -- from very ornate to plain and simple. But I had never made a dingbat font, so I didn't want to try. Then I saw in the newsgroups that someone was looking for one, and no one had a good one. So I went ahead with it. Crosses mean a lot to me. It symbolizes when Jesus died for our sins. No one knows what the real cross really looked like (even though I saw the "real" cross in a church in Rome). So there are many adaptations. But they all hold the same meaning. Please only use this font in a way that is glorifying to God. In this font, I have included a wide variety of crosses. Some traditional and some not. I have included some Celtic crosses, an Assisi cross (a Greek Tau), some crosses that were cut out of wood, and some that I just thought looked neat. I would like to find more crosses, and make another font with those. If you know of any that I didn't include, but are cool, tell me about them. My e-mail is included.

<http://www.latech.edu/~bmcgehee/untype/index.htm> <mailto:bmcgehee@enr.latech.edu> You use this font in any way that you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.) You may distribute it on CD, disk, or any other medium, but you may not sell it.

EDB Indians Regular EDBINDIA Macromedia Fontographer 4.1 EDB Indians EDB Indians Version 1.00 12/15/97
 EDBIndians Collaboration between Ben McGehee of Unauthorized Type and Edward Buri. Unauthorized Type Ben
 McGehee This version includes upper and lowercase letters and most punctuation. I also included some UA Type dingbats
 (just to amuse myself, and so you don't get those annoying boxes when you type something that isn't in the font). This is
 about as close to a Thanksgiving font as you come. Problem is, the release date was about two weeks for Thanksgiving of
 1997. Maybe it will be used for subsequent years. Edward Buri sent me an e-mail saying he had doodled some letters, and
 could I make them into an alphabet? He sent me lots of pages of ideas, and I told him that this one would work out great, if
 he could complete it. He did, and I fonted it. The upper-case outline version is what he gave to me. I just did those filled-in
 lowercase versions because I wanted to. I didn't realize when I started that it would double the completion time. Yeah.
<http://www.latech.edu/~bmcgehee/untype/index.htm> <mailto:bmcgehee@engr.latech.edu> You use this font in any way that
 you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.)
 You may distribute it on CD, disk, or any other medium, but you may not sell it.

Flubber Regular FLUBBER_ Macromedia Fontographer 4.1 Flubber Flubber Version 1.0 8/14/97 Flubber
<http://www.latech.edu/~bmcgehee/untype/index.htm> Unauthorized Type Ben McGehee This version includes upper and lowercase letters, punctuation, and many international characters. I also included some UA Type dingbats (just to amuse myself, and so you don't get those annoying boxes when you type something that isn't in the font). Remember the "Absent-Minded Professor" from Disney? He accidently created this rubbery substance that bounced higher and higher and higher. He used it to make things fly. Well, I accidently dicovered the technique for making this font. And it has that rubbery - stretchy look to it. <http://www.latech.edu/~bmcgehee/untype/index.htm> <mailto:bmcgehee@engr.latech.edu> You use this font in any way that you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.) You may distribute it on CD, disk, or any other medium, but you may not sell it.

Knocked Around Regular KNOCARG_ Macromedia Fontographer 4.1 Knocked Around Knocked Around Macromedia
 Fontographer 4.1 4/13/97 KnockedAround Unauthorized Type Ben McGehee This initial version includes all normal
 characters, plus a few extras. This is my first attempt to create lowercase letters in a font. My first try at any font
 (Previewance - found at my web site) had two versions of each capital letters. I am hoping that this one can be of more use.
 As time goes by, and my skills increase, hopefully so will the quality of my fonts.
<http://www.latech.edu/~bmcgehee/untype/index.htm> <mailto:bmcgehee@enr.latech.edu> You use this font in any way that
 you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.)
 You may distribute it on CD, disk, or any other medium, but you may not sell it.

Odishi Regular ODISHI2 Odishi Odishi ver. 001.059 Odishi Digital Empires Inc. Digital Empires Inc. Stephen Tune
Odishi(TM) (c)1997, Digital Empires Inc.. All rights reserved. Freeware version Odishi took a while to create. The process
involved corel draw for the bare bones part of the font, then Fontographer was use to make the font accurate and uniform.
Kerning and spacing were used. This is a full feature type. We generated Adobe type1 and True Type. Again, we only
made them available in the Windows format, for now. We intend to explore the tectonics to generate Mac font formats
Although these are some of the first fonts coming out of Digital Empires Fontware foundry, we intend on improving them.
Don't you just love updates and patches. Odishi(TM) is a strong and sexy type. A while back I commissioned some artwork

for an idea of nasty or bad girls. A really strong n' hot babe needs a strong n' sexy type. Odishi (TM) is shareware. If you like, keep it, and use this font, please check out our web page at WWW.DigitalEmpires.com for pricing (the font will probably never be more than \$10). Feel free to share this font with others, but please include this documentation. Thanks, Steve email: Webmaster@DigitalEmpires.com http://Digitalempires.com/fontware http://Digitalempires.com

<http://www.latech.edu/~bmcgehee/untype/index.htm> Unauthorized Type Ben McGehee This version includes upper and lowercase letters, punctuation, and many international characters. I also included some new UA Type dingbats (just to amuse myself, and so you don't get those annoying boxes when you type something that isn't in the font). Fonts can get sick, just like people. This one was taking vacation in the Rockies, going to do some camping and hiking, and caught this disease. The spots gave it great pain, and it was jumping all around. I used my special font medicine to kill all the germs, but it was left distorted and still jumpy. <http://www.latech.edu/~bmcgehee/untype/index.htm>
<mailto:bmcgehee@enr.latech.edu> You use this font in any way that you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.) You may distribute it on CD, disk, or any other medium, but you may not sell it.

Sketchbook Regular SKETCHBO UAtype Sketchbook Sketchbook Version 11.27.98 Sketchbook Unauthorized Type - Ben McGehee Unauthorized Type Unauthorized Type I like to sketch sometimes. I'm not very good at it, though. Most everything turns into either letters or landscapes. But I was looking at some cartoons on the web, and the man had written sketchbook something like this. So I tried to simulate his style. I was pretty close, but no matter, it looks good. <mailto:bmcgehee@beyond.com> <http://members.xoom.com/UAtype/> You use this font in any way that you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.) You may distribute it on CD, disk, or any other medium, but you may not sell it.

Slightly Hollow Regular SLIGHRG_ Swollen Slightly Slightly Hollow Version 1.00 11/23/97 SlightlyHollow Unauthorized Type Unauthorized Type Ben McGehee This version includes upper and lowercase letters, punctuation, and a few international characters. I also included some UA Type dingbats (just to amuse myself, and so you don't get those annoying

boxes when you type something that isn't in the font). This could be considered an alternative to Swollen Slightly, since it was based on it. Or maybe you would call it a variation. Some people may think it's really cool. Some people will not. Thank you for taking the time to download this and read my ramblings.

<http://www.latech.edu/~bmcgehee/untype/index.htm> mailto:bmcgehee@enr.latech.edu You use this font in any way that you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.) You may distribute it on CD, disk, or any other medium, but you may not sell it.

Spotted Fever Regular SPOTF___ Macromedia Fontographer 4.1 Spotted Fever Spotted Fever Version 1.0 8/25/97 SpottedFever <http://www.latech.edu/~bmcgehee/untype/index.htm> Unauthorized Type Ben McGehee This version includes upper and lowercase letters, punctuation, and many international characters. I also included some new UA Type dingbats (just to amuse myself, and so you don't get those annoying boxes when you type something that isn't in the font). Fonts get sick, too. I personally have seen some really sick-looking fonts. This one seems to have caught a strain of Spotted Fever. But don't worry, it's not still contagious. I used my special font medicine to kill all the germs, but leave the look. <http://www.latech.edu/~bmcgehee/untype/index.htm> <mailto:bmcgehee@engr.latech.edu> You use this font in any way that

you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.)
You may distribute it on CD, disk, or any other medium, but you may not sell it.

 Swollen Slightly SWOLS__ Swollen Slightly Swollen Version 1.1 5/3/97 SwollenSlightly Unauthorized Type Unauthorized
 Type Ben McGehee This version contains all Capital and Lowercase letters, the numbers, most punctuation, some of the
 special characters, and some international characters by special request. I wanted to see what I could do straight in
 Fontographer, so I made a bunch of straight lines into letters. I figured it would be pretty cool if they were curved out, or

bloated a little. So I did that, and then decided to curve the inside parts of the letters back in. I may later take this and make some that are more swollen, but we'll just have to see about that. <http://www.latech.edu/~bmcgehee/untype/index.htm>
mailto:bmcgehee@engr.latech.edu You use this font in any way that you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.) You may distribute it on CD, disk, or any other medium, but you may not sell it.

I have a headache today; this is what it looks like. Not meant to be a pretty font. Headache caused by: Too Much English Paper,

Not Enough Money. [Divide By Zero] fonts: <http://members.aol.com/vroomfonde/ttf/>

<http://members.aol.com/vroomfonde/ttf/> <http://members.aol.com/imightbetm/> Here is the summary of the license for this font, which may be overridden by (most likely very similar) new licenses at the URL below. NO MONEY must ever exchange hands for this font file, without EXPLICIT WRITTEN PERMISSION from the designer. This means you MAY NOT SELL THIS FONT on a font-collection CD, nor singularly nor part of any other type package. You may distribute this font file to anyone you want, as long as you do not modify it and do not charge any money or services. You can use this font in noncommercial applications and websites freely and without the designer's permission. You can use this font for commercial purposes provided you notify the designer (ImightbeTM@aol.com) and provide him with a free sample of the associated product, where appropriate. Your conscience gets to decide what is appropriate. For the full license and updates: <http://members.aol.com/vroomfonde/ttf/legal.html> Mailing address: Tom Murphy 7 339 Still Hill Rd Hamden CT 06518.1830 USA <http://members.aol.com/vroomfonde/ttf/legal.html>

Top Speed Heavy Regular TOPSH_ Top Speed Heavy Top Speed Heavy Version 1.41 TopSpeedHeavy Jason Vanderhill Jason Vanderhill Top Speed Version 1.41 Released as Shareware December 1997 Copyright 1997 Jason Vanderhill Top Speed is inspired by a certain metal badge seen on the flanks of the finest coachbuilt automobiles in the world. It is a complete alphabet, albeit all lower case at the moment, based on the letters p, i, n, f, a, and r. Top Speed Version 1.41 is currently available as shareware. For \$10, you are entitled to a single-user licence for Top Speed Normal, Top Speed Outline, and Top Speed Heavy. Please send a cheque or money order to: Jason Vanderhill R.R. #1 Dorchester, ON N0L 1G4 canada Feel free to email me at vanderhr@skyia.com ...about Top Speed...

Top Speed is strictly a display typeface, and should be used for no more than one line--preferably only one or two words--at a time. The most distinctive feature of Top Speed is the fact that all the letterforms are connected to each other. To maintain this look, all the characters have tails. The forward-slash character (and underline character) can be inserted between words instead of using the space bar, maintaining the continuous baseline. The back-slash character is a somewhat shorter connector; the "|" key is a slightly longer connector. To begin your word or line of text, you should insert a small version of the baseline, which is the "<" character. This will start off your type with an appropriate "tail." To finish off your line of type, use the ">" character, as it will end your tail at the appropriate distance. These characters are more necessary in the Outline version of the font. Top Speed may require minor kerning adjustment with some characters. Because each letter must be placed EXACTLY next to the following letter, (Top Speed Normal and Heavy are slightly more forgiving) you might notice a sliver appear between an occasional pair of letters. There are no differences in the capital letters except for the letter F. The capital letter F does not continue along the baseline, but instead it can run into certain letters (typically, the a, o, or u) through it's horizontal crossed stroke. The Outline version of the capital F contains an extra bit of black. This fills up the "hole" left at the beginning of the next character. If the capital F is used to end a word or sentence using Top Speed Outline, that little speck will have to somehow be creatively covered up. Top Speed is my first computer designed typeface. It was created completely in CorelDraw 7. Since this was my first font, I did stumble through the whole process a bit, and as a result, it does contain the odd imperfection. For example, I am not sure how to get my apostrophes and quotation marks to work. Currently, the null character is inserted instead. In a way, it's a bit of a handmade product. I began the font in the spring, basically ignored it all summer, and then finished it in the fall. Mostly, it has been fun. I hope you enjoy it.

The typeface name 'Top Speed' has been registered at the Goudy International Typeface Center in Rochester, New York, 1997. This font may not be sold or modified without my consent. Top Speed may not be distributed without this text file (or embedded description).

XSerif Baltic Regular XSERBALT DTP-XSerif Baltic XSerif Baltic Version 1.00 XSerifBaltic Created by Type-Designer 3.0

XSerif Cyr Regular XSERCYR DTP-XSerif Cyr XSerif Cyr Version 1.00 XSerifCyr Created by Type-Designer 3.0

XSerif Old Russian Regular XSOLDRUS DTP-XSerif Old Russian XSerif Old Russian Version 1.00 XSerifOldRussian
 Created by Type-Designer 3.0 Slovo This is a Cyrillic font according to Windows Cyrillic Codepage (1251) but with some characters of pre-1918 Russian orthography added to the following char positions: 0134 - capital Yat' 0135 - small yat' 0164 - capital Fita 0169 - capital Izhitsa 0172 - small fita 0174 - small izhitsa History When I wanted to create some special fonts for students of slavistics (e. g. for transliteration an Old Russian) I looked for a font with a "Times(r)"-like typeface that I could use as a base for my new fonts. But I found that all quality fonts are copyrighted and the quality of free and public domain fonts on Internet didn't please me, so I decided to create a new font with a slightly changed "Times(r)"-like typeface that I called "XSerif". Most common letters as "A" or "H" probably look like they do in every similar typeface, except slightly different proportions, serifs and weight, but some letters as cyrillic "zh" or cyrillic "l" are originally designed because I didn't like their shape in other "Times(r)"-like typefaces. There is only Regular typeface existing at this time. The fonts have a "symbol" encoding because of containing characters not supported by Windows 95 and for compatibility with Windows 3.1, that's why you won't see supported codepages in "UNICODE" table of Font Properties Extension. I hope there will be a UNICODE Version for Windows NT and UNICODE compliant text processors soon.
<http://www.odinet.de/slovo> <http://www.odinet.de/slovo/xserif.htm> You may use our fonts free of charge for non-profit purposes of education and research (that means you must not make money out of any material printed with these fonts!). They may also freely be distributed, but may not be distributed for profit either on a standalone basis or included as part of your own product. If you want to use a font for commercial purposes (e.g. to print a book that will be sold for profit) you will have to ask us for licence. If a font doesn't completely match your needs (e.g. if you need some more special characters or if you prefer another encoding scheme) feel free to change and improve the font - under two conditions: 1. You must give away the improved version of the font as FREEWARE in the Internet (e. g. by uploading to a public FTP-Server) 2. Please tell us about your improved font and send us a copy of it <http://www.odinet.de/slovo/xserif.htm>

XSerif Trediakovskij Regular XSTREDI DTP-XSerif Trediakovskij XSerif Trediakovskij Version 1.00 XSerifTrediakovskij
 Created by Type-Designer 3.0 Slovo This font contains the same pre-1918 Russian letters as "XSerif Old Russian" but the following letters were added: - letter "io" used in 18th century - some letters suggested by V.A. Trediakovskij in his "Razgovor ... ob ortografii ..." in 1748 Here are the char numbers of these special characters: 0166 - small "je" suggested by Trediakovskij 0167 - capital "E" suggested by Trediakovskij 0176 - capital "Io" used in 18th century 0177 - small "io" used in 18th century 0182 - small "io" suggested by Trediakovskij XSerif Typeface When I wanted to create some special fonts for students of slavistics (e. g. for transliteration an Old Russian) I looked for a font with a "Times(r)"-like typeface that I could use as a base for my new fonts. But I found that all quality fonts are copyrighted and the quality of free and public domain fonts on Internet didn't please me, so I decided to create a new font with a slightly changed "Times(r)"-like typeface that I called "XSerif". Most common letters as "A" or "H" probably look like they do in every similar typeface, except slightly different proportions, serifs and weight, but some letters as cyrillic "zh" or cyrillic "l" are originally designed because I didn't like their shape in other "Times(r)"-like typefaces. There is only Regular typeface existing at this time. I intend to create Italic and Bold versions, too, but this may take yet some months. The fonts have a "symbol" encoding because of containing characters not supported by Windows 95 and for compatibility with Windows 3.1. I hope there will be a UNICODE Version for Windows NT and UNICODE compliant text processors soon, but I currently don't know how to convert them to UNICODE. If you are looking for a base font to create fonts containing special characters you can use XSerif fonts under the two conditions described in "License" table. <http://www.odinet.de/slovo> <mailto:slovo@odinet.de> You may use our fonts free of charge for non-profit purposes of education and research (that means you must not make money out of any material printed with these fonts!). They may also freely be distributed, but may not be distributed for profit either on a standalone basis or included as part of your own product. If you want to use a font for commercial purposes (e.g. to print a book that will be sold for profit) you will have to ask us for licence. If a font doesn't completely match your needs (e.g. if you need some more special characters or if you prefer another encoding scheme) feel free to change and improve the font - under two conditions: 1. You must give away the improved version of the font as FREEWARE in the Internet (e. g. by uploading to a public FTP-Server) 2. Please tell us about your improved font and send us a copy of it (slovo@odinet.de) <http://www.odinet.de/slovo/xserif.htm>

Zhang QA Regular ZHANGQA_ Macromedia Fontographer 4.1 Zhang QA Zhang QA Macromedia Fontographer 4.1 5/3/97 ZhangQA Unauthorized Type Ben McGehee This version includes capital and lowercase letters, some commonly used punctuation and a few international characters (by special request). I major in Business at LA Tech. Everyone that majors in business has to take Quantitative Analysis 233. It is an extremely boring class. My teacher was especially boring. He was not from America, and could not speak English very well. He compensated for this by not speaking very much. My teacher's name was Hongkai Zhang. Since his lectures inspired this font, I felt it would do justice to name it after him and his class. The uppercase of this font was designed to look like letters running away. That's what half the class was doing the day I drew this font. The other half wanted to. Except me. I was having fun drawing this font.
<http://www.latech.edu/~bmcgehee/untype/index.htm> <mailto:bmcgehee@enr.latech.edu> You use this font in any way that you see fit. If you distribute it, I would like for the readme text file to accompany it. (That's just so they know who made it.) You may distribute it on CD, disk, or any other medium, but you may not sell it.
